AFL Season 2009

Rnd: 8 Match: 58 Saturday, May 16, 2009 MELBOURNE CRICKET GROUND
 Day Match **Melbourne vs Western Bulldogs**

Pro-Stats AFL Statistics

Prowess Sports has been an established provider of AFL statistics and innovative sports technology since 1987. It provides game analysis technology and services to many of the AFL teams plus affordable solutions for regional and domestic teams.

Information on our systems can be found @ <http://www.prowess.com.au/statmaster.htm>

How it's done

Prowess statisticians are extensively trained and accredited to use our innovative proprietary software. This allows statisticians directly "commentate" the events of the game without taking the eye off the vision (for example "Ablett kick long to advantage, inside 50.")
 The benefit of our technology and back-office operation is that more detail can be entered with diligence. For some of our AFL clients, we develop and provide custom and confidential stats and reports on a case by case basis. Each system has a custom keyboard, configurable stats buttons and menus to enter and edit the stats events. For live (1st Edition) games, around 1400-1600 events or transactions are logged on average. A detailed back-office (Final Edition) recording, between 2000-2500 transactions are logged which is about 40% more information but takes around 5 hours per game.
